Amazon Product Review & Sales Performance Dashboard

Prepared For: Power BI Dashboard Project

Prepared By: Arpita Mondal

Date: May 2026

1. Objective

The dashboard analyzes Amazon product pricing, discounts, ratings, and customer reviews for better business insights.

2. Dataset Overview

Dataset Name: Amazon Product Dataset

Total Records: 1465 Rows

Total Columns: 16 Columns

3. Data Cleaning

Removed duplicates, handled null values, converted data types, cleaned pricing columns, and standardized categories.

4. KPI Measures

Total Products, Average Rating, Avg Discount %, Total Rating Count, Avg Actual Price, Avg Discounted Price, Total Categories, High Rated Products.

5. Dashboard Pages

Page 1 focuses on Sales & Pricing Overview. Page 2 focuses on Customer Review & Rating Analysis.

6. Design Guidelines

Amazon-inspired theme, KPI cards, interactive slicers, navigation buttons, and proper chart spacing.

7. Expected Outcome

Helps identify top-performing products, customer preferences, and pricing strategies.

8. Tools & Technologies

Power BI, Excel/CSV Dataset, DAX Measures, Power Query.

9. Conclusion

Provides complete insights into Amazon sales and customer review performance using Power BI.
